

Vertical Batch Mixer

SVM-300U

Refer carefully to the manual before operation.

■ Coding Principle

Control Panel

■ Features

- Vertically mounted blending screw and cylinder ensure even mixing of materials.
- Function of feeding plus mixing simultaneously can save time significantly.
- Timer auto-stop function.
- Bottom material feeding method makes it easy for material supply.

■ Working Principle

■ Options

Rotary level sensor is optional, and add "HL" at the end of model code.

■ Application

SVM-U is mainly used for mixing plastics as raw materials, masterbatch and recycled materials. SVM-U can not be used dealing with plastic powder and all kinds of foods, chemicals, and inflammable, explosive and volatile materials. Bulk density should be taken into account when the dimension of material is uneven or in other forms.

Notes: 1) Max. mixing capacity is tested based on continuous processing material of 0.65kg/Lin bulk density and 2~3mm in size.
2) Power 3Φ, 230 / 400 / 460 / 575VAC, 50 / 60Hz.
